

The Transform Stents are designed and manufactured at our on-site laboratory in Cheshire.

#### How to order:

- 1) Send your stl scan across to [info@transformveneers.com](mailto:info@transformveneers.com) including as much information about what the patient wants, shape, style etc. (if you don't have a scanner, you can send alginate or silicone impressions).
- 2) The smile design will then be emailed across for you to review. If you want any changes made, this can be done.
- 3) Once you are happy with the smile design, we will then proceed to create the custom made stent.
- 4) The stents are made within 10 working days and posted out to you.
- 5) Your first stent will come with a video which will show you how to use the stent, instruments and materials you need to carry out the treatment.

#### Included in the kit:

- 3D model
- Try in stent
- Transform Stent with separators
- Full instructions

#### Price:

- Up to 6 teeth £300
- Up to 8 teeth £350  
(discount available if doing upper & lower teeth)
